

## **Rich Internet Applications using Interactive 3D Technologies.**

PMS Microdesign, Inc develops rich Internet applications using new interactive 3D technologies such as Shockwave3D, Flash3D, Acrobat3D, JAVA3D, AJAX3D, X3D and Google Earth. Integrating interactive 3D into rich Internet applications improves the marketing potential for products and services. These applications range from product brochures to virtual reality. This Acrobat3D example illustrates how a real time three-dimensional model can be integrated into an Acrobat document.
